

Disclaimer:

For the purpose of this exercise I assumed that every functionality of the application is desired and threatened it so. I will list some functionalities which I marked as „bugs“ but ignored them for the sake of the exercise:

- Checkout – unable to progress through checkout process , because „To payment“ button is permanently hidden when user starts filling in shipping information
- Sorting - both name and price sorting is not functioning correctly
- Whole login functionality

TC-001.1: Browse Items

ID	Step	Expected result
Precondition	User is on the Catalog screen	Preconditions fulfilled
1	Scroll through items on Catalog screen	picture, product name, price and review rating is shown for each item
2	Select a specific item	User is taken to item details for selected item
3	Use „Products“ button	User is taken back to Catalog screen and can continue browsing for other items

TC-001.2: Sort Items

ID	Step	Expected result
Precondition	User is on the catalog screen	Preconditions fulfilled
1	Sort Items by Name - Ascending	Verify that items are sorted correctly
2	Sort Items by Name – Descending	Verify that items are sorted correctly
3	Sort Items by Price – Ascending	Verify that items are sorted correctly
4	Sort Items by Price – Descending	Verify that items are sorted correctly

TC-001.3: Item details

ID	Step	Expected result
Precondition	User is on the catalog screen	Preconditions fulfilled
1	Select a specific item with multiple variants (eg. colour)	User is taken to item details for selected item. Price, Title, Product Highlights, Review and Image(s) of the product are visible.
2	Change quantity of item to 0	Add to cart button is disabled
3	Change quantity of item to higher value	User can edit number of items
4	Choose different variant of item	User can choose different variant of item other than default
5	Set review for the item	User can update review (1-5)
6	Add item To Cart	Item added to cart. Counter on „cart“ changed accordingly to number of items added

TC-002.1: Cart summary (logged in)

ID	Step	Expected result
Precondition	User is logged in and is on the cart screen with 2 different items in cart	Preconditions fulfilled
1	Check items in cart	For each item is visible: Title, price, review rating and quantity
2	Check total price	Total price is visible and is correctly calculated as a sum of all items in cart
3	Remove one of the items using „Remove Item“ button	Item removed from cart. Total price correctly recalculated
4	Use „Proceed To Checkout“ button	User is taken to Checkout screen

TC-002.2: Cart summary (not logged in)

ID	Step	Expected result
Precondition	User is not logged in and is on the cart screen with 2 different items in cart	Preconditions fulfilled
1	Check items in cart	For each item is visible: Title, price, review rating and quantity
2	Check total price	Total price is visible and is correctly calculated as a sum of all items in cart
3	Remove one of the items using „Remove Item“ button	Item removed from cart. Total price correctly recalculated
4	Use „Proceed To Checkout“ button	User is taken to Login screen
